Product Description

This 60 Series aluminum hardware aluminium corner joint is specifically designed for casement door frames and sashes. The aluminum material ensures durability and resistance to corrosion. The corner joint is crucial for maintaining the structural integrity of the casement door. It provides a secure connection between the frame and the sash, allowing for smooth operation and proper alignment. The 60 Series specification indicates its compatibility with a particular set of dimensions and designs within the casement door category. This corner joint is an essential component for ensuring the long-term performance and functionality of the casement door.

Support mold customization
