Product Description

A 304 Stainless Steel Continuous Long Piano Hinge with double-row holes is engineered for robust performance in doors, windows, boxes, and industrial packaging. Constructed from premium 304 stainless steel, this hinge combines corrosion resistance with high tensile strength, making it suitable for both indoor and harsh industrial environments. The continuous design ensures seamless support across long spans, while the double-row hole configuration enhances mounting stability--allowing precise alignment and distributing weight evenly to prevent stress concentrations. Its durable build resists wear, rust, and impact, ideal for heavy-duty applications like industrial machinery enclosures, shipping crates, or commercial storage units. The dual-hole pattern offers installation flexibility, accommodating various panel thicknesses, while the stainless steel finish provides a sleek, low-maintenance solution for both functional and aesthetic needs.
