Product Description

An 1800×38×1.5mm Stainless Steel 304 Long Piano Hinge is a heavy-duty hardware solution designed for large doors, windows, and furniture. Constructed from premium 304 stainless steel, this hinge features an extended 1800mm length, 38mm width, and 1.5mm thickness, delivering exceptional stability and load-bearing capacity for long-span fixtures. The continuous design ensures uniform support across the entire span, minimizing stress on attachment points, while the 304 stainless steel composition offers superior corrosion resistance—ideal for indoor and outdoor environments, including humid or coastal areas. Pre-drilled holes (if specified) enable precise installation, allowing seamless integration with large panels or heavy structures.

Its robust 1.5mm thickness enhances durability against wear and impact, making it suitable for commercial buildings,

industrial enclosures, or custom furniture that requires reliable, long-term performance. The sleek stainless steel finish combines functional resilience with aesthetic versatility, fitting both modern and traditional design schemes.
